

Sebastián Pitra

Full Stack Web Developer

Cel. +54 9 3755 61 1119 | [Portfolio](#) | sebastian.pitra10@gmail.com | [Linkedin](#) | [Github](#)

I am a Full Stack Developer focused on creating high quality and clean code. I consider myself a highly proactive and collaborative person, capable of working effectively as a team to meet project objectives and exceed client expectations. In addition, dedication and agile learning are values that are always applied in my daily work, which allows me to deliver high-quality results in a short time. I am always willing to face new challenges and contribute to the success of the organization where I work.

SKILLS

Javascript, Typescript, React, Redux, NodeJS, Express, PostgreSQL, Sequelize, MongoDB, Mongoose

EXPERIENCE

Full Stack Developer - Conin SMT

Abr. 23 - Currently

- Develop website to combat child malnutrition
- Work as a team to facilitate the achievement of objectives
- Refactor code to improve project scalability

I have developed key functionalities in the web application to combat the child malnutrition in the northern Argentina, including the payment system and obtaining records to facilitate the continuous monitoring of administrators. I worked closely with the developer team to refactor the existing code and increase its scalability.

Full Stack Developer - Portamor

Mar. 22 - Abr.23

Portamor, Lima, Peru

- Develop an online education platform
- Create technical solutions for complex problems.
- Participate in code reviews and provide constructive feedback to peers.

We have developed an online education platform for education and active aging of the elderly that was easy to use and intuitive. As a result, we were able to make education more accessible for this public, which improved their quality of life and ability to participate in this type of programs

PROJECTS

Full Stack Developer - E-commerce de NFT

Dic. 22 - Ene.23

Henry Bootcamp, Buenos Aires, Argentina

I implemented advanced payment solutions in our ecommerce platform of NFTs, such as the integration of digital currencies and the possibility of making payments with credit card. This improved the efficiency and user experience in our platform.

Full Stack Web Developer – Dog Breeds

Nov. 22 - Dic. 22

Henry Bootcamp, Buenos Aires, Argentina.

I developed a functional and attractive Single-Page-App that used an external API from dog breeds. The app allowed users to filter and sort breeds of dogs, create new breeds and also had a paging system. As a result, users were able to explore a wide variety of dog breeds from easy and fun way
